Mary Grace B. Bolos, DIT
CCMS, Instructor
Camarines Norte State College

Pamela Jane T. Babejes

Information Technology undergraduate from Camarines Norte State College with a strong focus on system analysis, technical documentation, and process modeling. Skilled in translating business and user requirements into clear system specifications, visual diagrams, and organized documentation that support effective system development and project execution. Seeking an OJT/Internship opportunity to apply technical and analytical skills in real-world projects.

PROJECT

PONDMATE: Fish Pond Management Mobile Application with IoT-Based Fish Feeder

- Led the development of a mobile app integrating IoT-based automated fish feeding for aquaculture management.
- Contributed to front-end and back-end development, ensuring smooth user interface and seamless functionality.
- Assisted in minor database handling for storing production schedules and activity logs.
- Designed production workflows and created breed-specific feeding schedules.
- Produced comprehensive technical documentation to support caretakers in monitoring and managing fish growth efficiently.

Municipal Civil Registrar Digital Record System

- Oversaw the creation of a digital system for municipal civil registration.
- Defined system requirements, and developed detailed technical and procedural documentation, improving record accuracy, accessibility, and compliance with regulatory standards.

Sustainable Smart Agriculture

- Led the preparation of thorough technical documentation for a smart agriculture solution focused on sustainability.
- Documented monitoring workflows and data-driven resource management features to help farmers optimize productivity while minimizing environmental impact.

SKILLS AND TOOLS

- Documentation & Analysis: Technical documentation, workflow diagrams, process mapping, requirement gathering
- Front-End Development: Mobile UI/UX design, Android development basics (Java/Kotlin), responsive layouts, web layouts
- Database Management: Basic database design, data entry, record management
- IoT & Automation: IoT integration for smart feeding and monitoring systems
- Software & Tools: Microsoft Word, Excel, PowerPoint, Visual Paradigm, 3ds Max (basic), Git/GitHub, Android Studio
- Technology Stack: HTML, CSS, Java

ACADEMIC & SCHOOL INVOLVEMENT

- Participated in the following showcasing different skills and critical thinking;
 - Design Expo 2023 Winner
 - Robotics and IoT school projects
 - Scriptwriter
 - Researcher
