Blk 16, Lot 4 Rosal Street Fairview 3 Subdivision
Brgy. Magang, Daet Camarines Norte
09957863021

OBJECTIVE

To obtain an IT internship applying skills in system analysis, documentation, and UI/UX design.

EDUCATION

Camarines Norte State College A.Y. 2022 - 2026 (Expected)
Bachelor of Science in Information Technology
Daet, Camarines Norte
Institutional GWA: 1.5

- Dean's List 2024
- Design Expo Winner 2023

Camarines Norte Senior High School A.Y. 2020 - 2022
Science Technology Engineering and Mathematics
Daet, Camarines Norte

Camarines Norte Junior High School A.Y. 2016 - 2020
Daet, Camarines Norte

SKILLS

Documentation & Analysis: Technical documentation, workflow diagrams, process mapping, requirements gathering, SRS writing

Front-End Development: Mobile UI/UX design, Android development (Java/Kotlin), responsive web layouts

Database Management: Basic database design, data entry, record management

IoT & Automation: IoT integration for smart feeding and monitoring systems

Software & Tools: Microsoft Word, Excel, PowerPoint, Visual Paradigm, Android Studio, Git/GitHub, 3ds Max (basic)

Technology Stack: HTML, CSS, Java, MySQL

Soft Skills: Communication, adaptability, teamwork, problem-solving, attention to detail

PROJECTS

PONDMATE: Fish Pond Management Mobile Application with IoT-Based Fish Feeder

- Led the system analysis of a mobile app integrating IoT-based automated fish feeding for aquaculture management.
- Contributed to front-end and back-end development, ensuring smooth user interface and seamless functionality.
- Assisted in minor database handling for storing production schedules and activity logs.
- Designed production workflows and created breed-specific feeding schedules.
- Produced comprehensive technical documentation to support caretakers in monitoring and managing fish growth efficiently.

Municipal Civil Registrar Digital Record System

- Oversaw the creation of a digital system for municipal civil registration.
- Defined system requirements, and developed detailed technical and procedural documentation, improving record accuracy, accessibility, and compliance with regulatory standards.

Sustainable Smart Agriculture

- Led the full thorough technical documentation for a smart agriculture solution focused on sustainability.
- Documented monitoring workflows and data-driven resource management features to help farmers optimize productivity while minimizing environmental impact.
